- 3. Bearings of the series 2208-6000 were produced to the number of 65,000 in the first half of July 1953.
- 4. Needle and swing bearings were delivered directly to the USSR as previously. The swing bearings were tested by Soviet engineers on stands. The bearings

were to stand 30,000 revolutions a minute without noise. About 80,000 of these were produced. Other customers for large bearings are Poland and China.

5. The materials position is excellent; the factory has large reserves of Swedish steel.

Available on loan in CIA Library are photographic reproductions of bearing types and wiring diagrams. 7
